

Recidivism Rates Fact Sheet

1. 2008 re-offense rate in PA= 3.1%. 3.1% calculated using PA DOC 2013 Recidivism Report data of 0.6% forcible rapes, 0% statutory rapes, and 2.5% other sexual offenses, p. 22 table 14.
2. 7-year re-offense rate in the U.S.= 7.7%.- U.S. Department of Justice, Bureau of Justice Statistics (2019). *Recidivism of sex offenders released from state prison: A 9-year follow-up (2005-14)*. Retrieved from <https://www.bjs.gov/content/pub/pdf/rsorsp9yfu0514.pdf>
3. Over 95% of sexual offenses committed before and after public registry requirements were committed by first time offenders.- Sandler, J.C., Freeman, N.J., & Socia, K.M. (2008). Does a watched pot boil? A time-series analysis of New York state's sex offender registration and notification law. *Psychology, Public Policy, and Law*, 14(4), 284-302.
4. The U.S. Bureau of Justice Statistics (2003) found the 3-year sexual re-offense rate to be 3.5%.- Bureau of Justice Statistics (2003). *Recidivism of sex offenders released from prison in 1994*. Washington, DC: U.S. Department of Justice. Retrieved from <http://www.bjs.gov/content/pub/pdf/rsorp94.pdf>
5. The risk of sexual reoffending reduces with time offense-free in the community.

| | |
|--------------------------------------|---|
| Static-99R Risk Level | Desistance Threshold Reached-Time offense-free in the community at which the individual poses no greater risk of sexually offending than those who have never committed a sexual offense. |
| Level I Very Low Risk | At time of release from prison |
| Level II Below Average Risk | 3 to 6 years |
| Level III Average Risk | 8 to 13 years |
| Level IVa Above Average Risk | 16 to 20 years |
| Level IVb Well Above Average Risk | 16 to 20 years |

-Hanson, R. K., Harris, A. J. R., Letourneau, E., Helmus, L. M., Thornton, D. (2018). Reductions in risk based on time offense-free in the community: Once a sexual offender, not always a sexual offender. *Psychology, Public Policy, and Law*, 24(1), 48-63.

6. Wormith et al., study followed 1,905 sex offenders, and 24,545 nonsexual offenders, who were released in Ontario, Canada, during 2004. The mean follow-up period for both groups was 4.5 years, with a standard

deviation of 106 days. 3.73 percent of the sex offenders (97% male) committed another sex offense during the follow-up period; 3.17 percent of the nonsexual offenders (80.5% male) did so. See Wormith et al., *supra* note 23, at 1521 tbl. 1. The difference between these two percentages was not statistically significant. There was also no difference between the groups in rate of nonsexual violent offenses.- J. Stephen Wormith, Sarah Hogg, & Lina Guzzo, *The Predictive Validity of a General Risk/Needs Assessment Inventory on Sexual Offender Recidivism and an Exploration of the Professional Override*, 39 CRIM. JUST. AND BEHAV. 1511, 1529-32 (2012).

7. Table 2 of the Hanson study shows a 5-year re-offense rate of 2.2% for low-risk sex offenders, and 6.7%, for moderate-risk offenders. These two groups together account for 74.2% of Hanson's sample of 7,740 offenders. Hanson, et al., at 2802.- R. Karl Hanson, Andrew J. R. Harris, Leslie Helmus, and David Thornton, *High Risk Sex Offenders May Not Be High Risk Forever*, 29 (15) J. OF INTERPERSONAL VIOLENCE 2792, 2792-813 (2014). The median year of release was 1996; the release year ranged from 1957 to 2007.
8. Among 20,195 persons released from state prisons in 2005 across 30 states after serving a sentence for rape or sexual assault, 8% were arrested for rape or sexual assault during the 9 years after their release.- Bureau of Justice Statistics (2019). *Recidivism of Sex Offenders Released from State Prison: A 9-Year Follow-Up (2005-2014)*. Washington, DC: U.S. Department of Justice. Retrieved from <https://bjs.ojp.gov/content/pub/pdf/rsorsp9yfu0514.pdf>
9. "In 2016, the Probation and Pretrial Services Office of the Administrative Office of the U.S. Courts published a study on the recidivism of individuals convicted of sexual offenses under federal supervision (Cohen & Spidell, 2016). The data came from 94 federal judicial districts and involved the records of 7,416 males with sexual offense convictions who were released from federal prison and placed on supervision during fiscal years 2007 through 2013. The authors of the study define recidivism as arrest for a new crime. Cohen and Spidell take a subsample of those on active supervision and find that 2.8% were rearrested for a new sexual offense within three years." - Lave, Tamara & Prescott, J.J. & Bridges, Grady. (2021). *The problem with assumptions: Revisiting "The dark figure of sexual recidivism"*. Behavioral Sciences & the Law. 39. 10.1002/bsl.2508 at pp. 7-8.- Cohen, T. H., & Spidell, M. C. (2016). *How dangerous are they? An analysis of sex offenders under federal post-conviction supervision*. *Federal Probation*, 80(2), 21–32.
10. "[I]n 2007, the Minnesota Department of Corrections published research evaluating the recidivism patterns of 3,166 individuals released in Minnesota following conviction and punishment for a sexual offense. The follow-up periods the researchers use range from 3 to 16 years, with an average of 8.4 years. During that period, 12% of these releasees were rearrested for a new sexual offense; 10% were reconvicted, and 7% were reincarcerated." Lave, Tamara & Prescott, J.J. & Bridges, Grady. (2021). *The problem with assumptions: Revisiting "The dark figure of sexual recidivism"*. Behavioral Sciences & the Law. 39. 10.1002/bsl.2508 at p. 8.- Minnesota Department of Corrections. (2007). *Sex Offender recidivism in Minnesota*.
11. The U.S. Sentencing Commission followed 32,135 federal offenders released from incarceration or sentenced to a term of probation in 2010 for eight years. They found that 49.3% (15,843 persons) of those released were rearrested; of that 49.3%, 31.4% (4,975 persons) were rearrested for a violent offense; of that 31.4%, 1.6% (80 persons) were rearrested for sexual assault. In other words, 0.2% of the 32,135 were rearrested for

sexual assault.- U.S. Sentencing Commission (2021). Recidivism of Federal Offenders Released in 2010. Retrieved from https://www.ussc.gov/sites/default/files/pdf/research-and-publications/research-publications/2021/20210930_Recidivism.pdf

12. A study was done in New Jersey to examine recidivism rates pre and post SORN laws. The pre-SORN group (1990–1994) included 247 offenders, while the post-SORN group (1996–2000) included 248 offenders. Pre-SORN recidivism rates were 8.2% while post-SORN recidivism rates were 9.7%. Tewksbury R, Jennings WG, Zgoba KM. *A longitudinal examination of sex offender recidivism prior to and following the implementation of SORN*. Behav Sci Law. 2012 May-Jun;30(3):308-28. doi: 10.1002/bsl.1009. Epub 2011 Sep 5. PMID: 21898579.

13. Dr. Kristen Zogba conducted another study in New Jersey. Data on 550 individual who committed a sexual offense released during the years 1990 to 2000 were collected. The pre-SORN group (19-). Pre-SORN recidivism rates were 10% while post-SORN recidivism rates were 7.6%. Zgoba, K., Witt, P., Dalessandro, M., & Veysey, B. (2008). *Megan's Law: Assessing the practical and monetary efficacy (report on grant award 2006-IJ-CX-0018)*. Washington, D.C.: National Institute of Justice.
